

A GLOBAL LIFE SCIENCES LEADER

BUSINESS NEED

Multiple pharma companies share a customer signaling tool that relies on data from diverse sources. This data, needs harmonization into a common format within a stage area for analytics and signal detection purpose.

The challenge is to create an efficient, shared environment that unifies data formats and addresses data management needs.

SOLUTION

JSuite is being used to establish a Data Lake platform for this customer, integrating it with source systems from multiple pharmac companies to extract and feed data into the Data Lake.

This seamless integration enables the customer to connect multiple disparate source systems with their signaling tool.

OUTCOME

- Seamless data flow from different customer source systems
- Simplified data acquisition and harmonization process
- Inbuilt source data and transformation reconciliation reports
- Visibility of each data load activities through intuitive UI

ABOUT MARLABS

Marlabs designs and develops digital solutions that help our clients improve their digital outcomes. We deliver new business value through data & AI consulting, custom application development, advanced software engineering, digital-first strategy & advisory services, digital labs for rapid solution incubation and prototyping, to build and scale digital solutions.
