A Holistic Approach to Supply Chain Excellence: Marlabs' End-to-End Infor Solution

case study

Business Need

The client is a global industry-leading manufacturer of concrete building and hardscape products that faced several challenges, including higher inventory levels, limited forecasting capabilities, financial period closure issues, technical debt, supply chain inefficiencies, manual route planning, limited MIS capabilities, and manual reporting.

Solution

To address these challenges, Marlabs implemented a diverse portfolio of solutions, including the Infor CloudSuite Distribution Enterprise across sites in the US and UK. Key solution levers included the implementation of a full cloud-based Infor Distribution Enterprise solution suite, Infor Supply Chain Planner, enhanced forecasting abilities using the Infor Supply Chain Planning solution, Infor Accelerator-based processes, and additional solutions such as Vertex, MES, Sales Hub, and OTM.

Outcome

- ▶ **Operational Efficiency:** Reduced inventory levels, streamlined financial period closures, and mitigated technical debt.
- ▶ **Enhanced Capabilities:** Improved forecasting capabilities, enhanced supply chain efficiency, and automated route planning.
- ▶ **Strategic Preparedness:** Improved MIS capabilities, automated reporting processes, and preparedness for future acquisitions.
